FMI Chemical Welcomes Travis Softic as New R&D Chemist

Bloomfield, CT, April 12, 2018 -- FMI Chemical, Inc. is pleased to announce that Travis Softic has joined the company as Research and Development (R&D) Chemist.

"Travis brings a robust background in raw materials, combined with practical experience in R&D and technical chemistry to FMI," says Nancy Daigle, company Director of Finance and Operations. "Travis' skills and solution-driven expertise are going to prove valuable to our customers as we manufacture high-performance nonmetallic sealants and compounds for the aerospace and aircraft marketplaces; as well as offer custom manufacturing services to our customers."

Travis Softic, new R&D Chemist at FMI Chemical.

Softic earned his Bachelor of Science in biochemistry and chemistry from the University of Massachusetts in Amherst, MA. Mr. Softic held vital R&D chemistry and technical service chemistry positions with Randolph Products and Presstek LLC before joining FMI Chemical.

About FMI Chemical

FMI Chemical, Inc. manufactures Thermosil heat-resistant sealants for jet engines, as well as offers custom repackaging and manufacturing services for nonmetallic sealants, compounds, and coatings used in aircraft manufacturing and MRO. FMI Chemical's Nadcap® and ANAB® accredited testing laboratory can provide performance and quality assurance testing for nonmetallic materials to meet customer specifications.
