

Conflict Minerals Policy

FMI Chemical, Inc. is committed to sourcing materials from companies that share our values regarding human rights, ethics and environmental responsibility. On August 22, 2012, the U.S. Securities and Exchange Commission (SEC) approved the final rule regarding sourcing of conflict minerals under Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act). The rule imposes reporting requirements on publicly traded companies, subject to the SEC, to annually report the presence of conflict minerals originating in the Democratic Republic of the Congo (DRC) or adjoining countries (Covered Countries) in the products they manufacture or contract to manufacture, whereby the conflict minerals are necessary to the functionality or production of a product. Conflict minerals include columbite-tantalite (coltan; i.e., tantalum); cassiterite (i.e., tin); wolframite (i.e., tungsten); gold, or their derivatives.

FMI Chemical, Inc. supports the humanitarian goal of the Dodd-Frank Act in ending the illegal trade of conflict minerals originating in the DRC.

FMI Chemical is committed to:

- Avoiding the use of conflict minerals which directly or indirectly finance or benefit armed groups in the DRC or adjoining countries;
- Enabling transparency in our supplier relationships;
- Building responsible supplier relationships; and
- Minimizing the environmental and social footprint of our supply chain.

In order to meet these commitments, **FMI Chemical** will:

- Utilize the [Source Intelligence](#) platform for supply chain tracing and transparency;
- Leverage the web-based [Conflict Minerals Resource Center](#) for the most up-to-date information regarding conflict minerals; and
- Routinely assess our suppliers' compliance with this policy.
